

Reference website: <http://www.modcloth.com/>

DETAILS:::

1. Header: in left part, there is an ajax search bar like modcloth, middle company name/logo, right side 'sign up', 'join', 'cart', (all must be in admin panel, can remove or edit names)
2. Menu: Must have a mega menu with categories left side and right side with four/five/three different photos with title like modcloth(categories will be added through admin panel also the images with titles)
3. Homepage: will have slider, with min 10imgs with buttons, then 4 blocks with 4 different categories which will be randomly selected by me in admin panel, category product will have bootstrap carousal slider
4. Then will have two blocks of images side by side with link (also can be managed by admin panel)
5. A block for brands logo (can be added by admin panel)
6. Footer part (4 blocks) (can be added by admin panel)
7. There is a blog part also which is created on subdomain on modcloth, you need to provide that as well
8. Product page will just like modcloth.com, every details need on my website with categories and others on left side bar/ right side bar (search categories can be added or removed through admin panel also the sidebar with left/right sidebar option)
9. Each product page also need to be like modcloth, if a customer buy a product and post it on outfit photos, it will appear on that product,
*** <http://www.modcloth.com/shop/shorts-rompers/play-by-playful-shorts-in-petal-plaid>
Social sharing, review of products can be given also if any other one leave a review, people can know that if they want
10. In modcloth, go to 'outfit photos', it is a section where people can create account through their order tracking/ facebook/email login and post their photos with a dress, shoes or accessories which was/were brought from modcloth and also this will show on that specific product/products page
11. Each account will on database
12. When people upload their photos, they must select that product category, product and upload it

13. Other people also can create account and follow one of the current customer

14. Admin will have full access on customer management of 'outfit photos'

More discussions will be made after contract.
