Title: YITH Advance Refund plugin customization

On customer's my account dashboard, when customer applies for refund, the refund button is not working.

We need to customize the plugin as, admin will set order status and days, e.g. at X order status and at within X days customer can apply for refund. If admin set for "Due" order status and "10" days, then when in customer's dashboard its "Due" order status within 10 days then they can apply for refund.

Please see the attachment to get the full understanding.

TERMS::::

Candidates must be able to available for skype calls with screen shares as it's a long-term full stack developer job for the selected candidates.

Developers will be working on a testing subdomain, after completing the tasks, all the candidates must provide documentation on implementing the necessary programmes on our main working websites, if face any problem need to assist with at least two websites.

No payment will be done for half-done 90% done jobs, as three or four developers wok on the same task.
